DRIWALL™ PREFABRICATED COMPOSITE DRAIN
 1/8" SELF-ADHERING MEMBRANE " SPACERS " @ 12" O.C.
DRIWALL™ MEMBRANE
 .26 GA GALVANIZED DRIP EDGE
 EXTERIOR VENEER

TriDent DD and Driwall™ Prefabricated Composite Drain (PCD) products are drainage mats designed to eliminate hydrostatic pressure from behind foundation walls, retaining walls, planters, plaza decks, and balconies.

A filter fabric is heat-laminated or adhered to one side of the mat to hold soil or concrete away from the wall or deck and keep the drainage plane clear.

Driwall™ PCD is 0.125 - 0.75 inches thick (3.175 - 19.0 mm thick)

Driwall™ Membrane is a self-adhering flashing and waterproofing membrane for full-wall or flashing applications in masonry, wood or gypsum construction. It provides an air and vapor barrier with excellent adhesion to concrete, galvanized metal, steel, plywood and gypsum.

Driwall™ Membrane 40 mil (1.0 mm thick and rolls are 75-feet (22.8 m) long)
Driwall™ Membrane 60 mil (1.5 mm thick and rolls are 67-feet (20.4 m) long)
