MOISTURE MANAGEMENT FOR MASONRY

MortarFlash™
Self-Adhering Copper Flashing

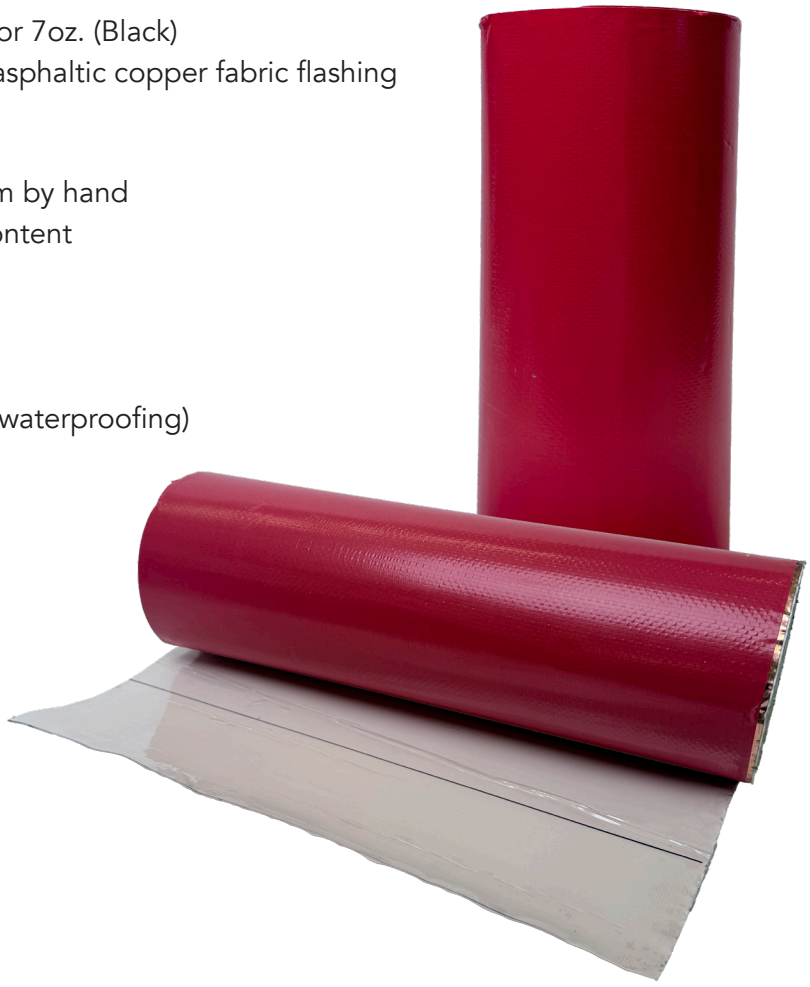
Technical Data Sheet

PRODUCT DESCRIPTION

MortarFlash™ Self-Adhering Copper flashing is a high-performance flashing designed for durability and ease of installation. It consists of a flexible 3oz., 5oz., or 7oz. sheet of Copper with a polymer fabric laminated to one side with butyl adhesive and a siliconized release liner, delivering **best-in-class puncture and tear resistance**. This product is engineered to withstand harsh environmental conditions, making it ideal for demanding construction applications.

PRODUCT FEATURES

- **Available Grades:** 3oz. (Gray), 5oz. (Red), or 7oz. (Black)
- **Performance:** Meets all specifications for asphaltic copper fabric flashing
- **Primer:** Not required
- **UV Stability:** 90 days
- **Workability:** Flexible, easy to cut, and form by hand
- **Sustainability:** Made with 90% recycled content
-



APPLICATIONS

- Through-wall flashing
- Transition membrane (air barriers, roofing, waterproofing)
- Jamb closure flashing
- Roof-to-parapet flashing

COMPATIBILITY

- Air barriers
- Spray polyurethane foam
- Insulation boards
- Below-grade waterproofing
- Roofing membranes
- Construction sealants

MADE IN USA AMERICAN PRODUCT

TECHNICAL DATA

Property	Test Method	MortarFlash Copper
Puncture (PSI) 3oz - 5oz - 7oz	ASTM E154	540 – 780 - 850
Tensile	ASTM D412	32,000
Fire Resistant	ASTM E84	Pass, Class B
Mold Resistant	ASTM D3273	Pass
Recyclable Content		90%
Recyclable Material		Yes
UV Exposure (days)		90
Application		20° – 170° F
Membrane stability		-70° – 250° F
